

## What is Life Notes Review

Name: \_\_\_\_\_ Date: \_\_\_\_\_

Section: \_\_\_\_\_ Score: \_\_\_\_\_

- 1) Describe what characteristics all living things have.
- 2) Describe and give examples for unicellular and multicellular organisms.
- 3) Describe and give examples for two ways organisms respond to their surroundings.
- 4) What is spontaneous generation, and how was it disproved?
- 5) What are the needs of all living things?

## Performance Task

- 1) Give a specific example and describe a living organism. How does this organism obtain and meet the four needs of living things?
- 2) Describe and compare how Redi's experiment and Pasteur's experiment disproved spontaneous generation.
